

Section 5: Creating a Continuous Delivery Pipeline

Now that you are done with the videos of section 5, let's assess your learning. Here, are a few questions; followed by a few options, out of which 1 is the correct option. Select the right option and validate your learning! The answers are provided in a separate sheet.

Q1. State whether true or false:

To present the test results the build step "junit" has to be added.

- a. True
- b. False

Q2. How can I verify if the artifact is used across different projects?

- a. adding a step to archive the artifact and add the fingerprint attribute
- b. adding a step to archive the artifact
- c. adding a step to stash the artifact
- d. I don't need to configure anything; Jenkins will take care of that automatically.

Q3. State whether true or false:

To create a gate to receive a manually input it's necessary to add the "input" build step.

- a. True
- b. False
